Environmental Compliance Manager
Flapaloo Products
45-70 Government Lane
Dogpatch, NC 27105

Re: CY 2021 Emissions Inventory for Flapaloo Products (Premise 00222)

Dear Mr. Phogbound:

This letter is notice that you are required by Chapter 3 of the Forsyth County Air Quality Technical Code, Subchapter 3Q, Rule .0207 and Subchapter 3D, Rule .0202 to quantify your facility's calendar year 2021 air pollutant emissions and report those emissions data to the Forsyth County Office of Environmental Assistance and Protection (FCEAP). Emissions inventory data are utilized in air quality planning, toxic risk assessment, determination of permit fees, satisfaction of Federal emission reporting requirements and other related purposes. You are required to provide your best estimate of actual emissions of each regulated pollutant from all sources of emissions at your facility in addition to information about your processes and emission release points. Please complete and submit your emission inventory to this Office by **June 30, 2022**.

We are not providing paper forms for this year and future year inventories. Consequently, you are required to report your emissions inventory via the Microsoft Access database that is attached to the same email as this notification. You must have Microsoft Access 2003 or higher installed on your computer to take advantage of this method. **Do not use a database provided for an earlier emissions inventory to submit your 2021 emissions inventory.** You must utilize the latest version of the emission inventory database due to a substantial update this year. If you are unable to use Microsoft Access, please contact me at huntbb@forsyth.cc to make alternative arrangements. Instructions and other information to help you prepare the emissions inventory are available on the FCEAP's website at <https://www.co.forsyth.nc.us/EAP/forms.aspx>. If you have questions or would like assistance preparing your facility's emissions inventory, you are encouraged to contact your case manager at the Office of Environmental Assistance and Protection at 336-703-2440. Your case manager is familiar with your facility's processes and will be able to provide guidance and assistance with calculating emissions as well as help identify additional information necessary for your submittal.

If you have questions about the emissions inventory process or wish to discuss emission inventory submittal via database, please email me at the address above or call me at 336-703-2424. Due to current operating conditions, email is the best method of communication.

Your cooperation and timely attention to this matter are greatly appreciated.

Sincerely,

Brian B. Hunt
