Examples are grounds maintenance and management information services. These entries do not constitute actual appropriations of funds.

Modified Accrual

The County follows the modified accrual basis of accounting for all funds, under which revenues are recorded as the amount becomes susceptible to accrual by becoming measurable and available to pay current period liabilities. Expenditures, other than interest on general long-term obligations and vacation pay are recorded when the liability is incurred, if measurable. Interest on general long-term obligations is recorded when due.

Glossary (Contd.)

Modified Accrual (Contd.)

In applying the susceptible to accrual concept to intergovernmental revenues, the legal and contractual requirements of the numerous individual programs are used as guidance. There are, however, essentially two types of these revenues. In one, monies must be expended on the specific purpose or project before any amount will be reimbursed to the County; therefore, revenues are recognized based upon the expenditures recorded. In the other, monies are virtually unrestricted as to purpose of expenditure and are usually revocable only for failure to comply with prescribed compliance requirements. These resources are reflected as revenues at the time of receipt or earlier if the susceptible to accrual criteria are met.

Charges for services (other than health-related) and intangibles and sales taxes are recorded as revenues when received in cash because they are generally not measurable until actually received. Interest on investments is recorded as earned since it is both measurable and available.

Occupancy Tax
