

INSTRUCTIONS

REVISION FOR NESHAP PERMIT/NOTIFICATION

- PURPOSE:** This form shall be used for the required reporting of revisions to any active Forsyth County Office of Environmental Assistance & Protection (Office) Permit for asbestos removal and/or demolition notification.
- PREPARATION:** This form shall be completed when any revisions occur for scheduled start and/or complete dates for asbestos removals and/or demolitions; when additional amounts of regulated asbestos-containing materials (RACM) are to be removed; and for other revisions that substantially alter the originally approved permit or notification (e.g., waste transporters, waste disposal sites, other operators).
- INSTRUCTIONS:** Complete the facility name and address; contractor's name and address; contact person's name and contact person's telephone number.
- Indicate any revisions in removal and/or demolition start and/or complete date(s). Check "on hold" if renovation/demolition project has been placed on hold.
- If the amounts of RACM are revised, enter the ADDITIONAL amounts in the corresponding blanks and compute the additional fees accordingly.
- Enter the certifying individual's name, title, and company name. The certifying individual must sign and date the form as indicated. **Renovation revisions shall be completed with an original signature and require submittal via hand delivery or mail service.**
- GUIDELINES:** If a removal and/or demolition is to begin earlier than the original start date, the Revision form must be received by the Office at least 10 working days before the new start date. Removals and/or demolitions may be placed in "on hold" status; however, the work must be conducted within 12 months from the original start date. If not, the original permit or notification is automatically revoked. The owner or owner's representative must submit a revision giving the new start and complete dates prior to resuming work on the project.
